

Red		Yellow		Blue	
How many red chameleons can you count?		How many yellow chameleons can you count?		How many blue chameleons can you count?	

Sorting, matching and counting using our 3 primary colours.

Instructions:

- Print both pages and cut out the coloured chameleons from page 2.
- Stick some prestick on the back of each chameleon.
- Invite your child to match the colour of the chameleon to the colour words in the table provided on page one.
- For older children ask them to count the different chameleons in each colour group and help them write the answer in the blocks provided.

Benefits: *Sorting, matching and counting activities are important for early cognitive development. It helps your child to notice differences and similarities between different objects and develops early literacy and numeracy skills.*
