

# Watering Whole

Montessori inspired activity for grading shades of blue dolphins from dark to light.

## Instructions:

Cut out the dolphins and mix them up. Invite your child to grade the dolphins from darkest to lightest. You can show them how to do it first by taking 2 at a time and comparing them side by side. Point to each one and say things like darker, darkest, lighter and lightest.

## Benefits:

Activities like this help children begin to discern subtle differences important for visual discrimination and colour perception.
